Postman | BrowserStack | DevTools

HTML | CSS | SQL | MySQL

Analytical thinking | Problem solving

Creativity | Can-do mindset

Communication skills | Interpersonal skills

Growth mindset | Teamwork

Languages

English [B2] | Polish [native]

About me

I became interested in software testing because of my communicative nature, problem-finding mindset, and analytical skills.

I am educating myself by reading the blogs, and books about testing, watching Udemy and Youtube courses, exercising at w3schools, and listening to podcasts, besides I am acquiring practical knowledge by participating in uTest projects and other crowdsourcing testing projects.
I still try my best to learn and grow as an aspiring tester and I am aware that is just the start of the path I want to pursue.

Work History

Feb 2022 - present	Software Tester <i>uTest.com, Remotely</i> I participated in the following application testing projects: <ul style="list-style-type: none">web - exploratory tests of e-commerce platform that included correct cart operation and coupon discounting. I found somewhat valuable issues for the client.web & mobile - exploratory tests of the identity authentication application using documents such as a passport, ID card or driving license. I found one very valuable issue for the client on a mobile device (the user could not see a crucial dropdown list for this project).mobile - exploratory tests of car rental app focusing on visual and content areas.
Mar 2021 - present	Process Technician <i>MS-Progress, Rudzica</i> <ul style="list-style-type: none">Creating, editing and providing process documentation in accordance with accepted standards.Setting and stabilization of the injection process in accordance with process documentation.Striving for the best possible efficiency, reducing costs, and accelerating processes.Consultation with other departments to achieve specific actions.
Aug 2019 - Mar 2021	Injection Molding Setter <i>MS-Progress, Rudzica</i> <ul style="list-style-type: none">Changing moulds on injection machines, preparing working sockets for production, and setting up injection processes according to the product documentation.
Mar 2017 - present	Injection Molding Setter <i>Lys Fusion Poland sp. z o.o., Istebna</i> <ul style="list-style-type: none">Changing moulds on injection machines, preparing working sockets for production, and setting up injection processes according to the product documentation.
Oct 2014 - Feb 2017	Injection Molding Machine Operator <i>Lys Fusion Poland sp. z o.o., Istebna</i> <ul style="list-style-type: none">Packing parts.Performing measurements of parts following the self-control card.
