### Skills

Analytical skills | Observation skills

Testing theory | Manual testing | Creating test cases

JIRA | Trello | TestRail

Postman | BrowserStack | DevTools

HTML | CSS | SQL | MySQL

### Languages

English [B2] | Polish [native]

I finished technical school of computer science.

Unfortunately, life took a slightly different direction than I planned, and I ended up in the plastics processing industry.

Due to my current job's lack of self-development opportunities, I need change.

After a few years, I would like to return to IT.  
I became interested in software testing because of my communicative nature, problem-finding mindset, and analytical skills.  
I am educating myself by reading the ISTQB syllabus, Udemy courses, etc.  
I am participating in projects on uTest.com and other crowdsourcing testing projects.

### Work History

Feb 2022 - present	<b>Software Tester</b> <i>uTest.com, Remotely</i>  I participated in the following application testing projects: <ul style="list-style-type: none"><li>e-commerce web - online store, discounting with a coupon, correct operation of the cart</li><li>web - the process of identity authentication using documents such as a passport, ID card or driving license</li><li>mobile - car rental</li></ul>
