Skills

Testing theory | Manual testing | Creating test cases

JIRA | Trello | TestRail

Postman | BrowserStack | DevTools

HTML | CSS | SQL | MySQL

___

Analytical thinking | Problem solving

Creativity | Can-do mindset

Communication skills | Interpersonal skills

Growth mindset | Teamwork

Languages

English [B2] | Polish [native]

I became interested in software testing because of my communicative nature, problem-finding mindset, and analytical skills.
I am educating myself by reading the ISTQB syllabus, Udemy courses, etc.
I am participating in projects on uTest.com and other crowdsourcing testing projects.

Work History

Feb 2022 - present

Software Tester

uTest.com, Remotely

I participated in the following application testing projects:
- **web** - exploratory tests of **e-commerce platform** that included correct cart operation and coupon discounting. I used Chrome DevTools mostly. I found a few visual and one functional issue.
- **web & mobile** - exploratory tests of the **identity authentication application** using documents such as a passport, ID card or driving license. I found one very valuable issue for the client on a mobile device (the user could not see a dropdown list that was crucial for this project).
- **mobile** - exploratory tests of car rental app. I found just a few typos on the "Privacy Statement" page.

Mar 2021 - present

Process Technician

MS-Progress, Wieszczęcka 755, 43-394 Rudzica

- Creating, editing and providing process documentation in accordance with accepted standards.
